THE OFFICIAL RULES

The Game in Brief

MONOPOLY is the game of buying, renting or selling properties so profitably that players

increase their wealth — the wealthiest becoming the eventual winner. Starting from the “GO” space, your token moves around the board according to your dice roll. When you land on a space that is not already owned by someone else, you may buy it from the Bank. If you choose not to buy it, you must auction it off to the highest bidder. Players who own properties collect rents from opponents landing there. The construction of houses and hotels greatly increases the rent you can collect on properties, so it is wise to build on as many sites as possible. If you need to raise more money, the Bank can give mortgages on properties. You must always obey the instructions given on Chance and Community Chest cards. Sometimes you will be sent to Jail.

Object

To be the only player left in the game that is not bankrupt.

Playing the Game

At the start of the game you will be given \$1,500.

On your turn, roll the dice and move forwards around the board in the direction of the arrow. The space you land on will determine what you have to do next. (Two or more tokens may rest on the same space at the same time.)

The space you land on may require you to do one of the following:

- Buy properties (if you choose)
- Pay rent (if you land on an owned property)
- Pay taxes
- Draw a Chance or Community Chest card
- Go to Jail
- Rest on the Free Parking space
- Collect \$200 salary

Rolling Doubles

Take your regular turn; then roll the dice again for another turn. If you roll doubles for a third time in succession, you will be sent directly to Jail.

Passing “GO”

Every time you either land on or pass “GO,” you receive \$200 from the Bank.

Buying Property

If you land on an unowned property, you may buy it if you so choose. If you decide to buy, the price of the property will be deducted from your cash funds. You will receive in exchange, as proof of ownership, that property's Title Deed.

If you decide not to buy, you must immediately auction the property to the highest bidder. Even though you declined the option of buying

at the original price, you may join in the bidding. (See “Auction” on page 12.)

Owning Property

Owning property entitles you to collect rent from any “tenants” (other players) who land on that space. It is an advantage to own all the properties within a color-group — in other words to own a monopoly. You can build on any properties for which you own the complete color-group (as long as no properties within that color-group are mortgaged).

Landing on Owned Property

If you land on a property that has previously been bought by another player,

you may be required to pay rent. The amount payable is shown on the Title Deed for that property and will vary according to the number of buildings on it. If a player owns all properties within a color-group, the rent payable is doubled on any property of that group not yet developed.

Note: You cannot collect double rent if any one site in a color-group is mortgaged. Where houses or hotels have been built on a property, the rent will increase and will be shown on that property's Title Deed. Rent is not payable on mortgaged properties.

TITLE DEED CAMBRIDGE	
RENT \$8.	
With 1 House	\$ 40.
With 2 Houses	100.
With 3 Houses	300.
With 4 Houses	450.
With HOTEL	\$ 600.
Mortgage Value \$ 60.	
Houses cost \$ 50. each	
Hotels \$ 50. (plus 4 houses)	
If a player owns ALL the sites of any color-group, the rent is doubled on unmortgaged sites in that group.	
© 1995 Hasbro Properties	

Landing on the Utilities

If you land on a utility, and it is not already owned, you may buy it. If, however, the utility is already owned, you may be asked to pay rent to the owner. Rent amount is determined by your already rolled dice. If the owner has only one of the utilities, the rent will be four times your dice roll. If, however, the same player owns both utilities, you must pay ten times the amount of your dice roll. If you are sent to the utility as a result of a Chance or Community Chest card, you must roll the dice to determine how much you should pay. If you decide not to buy, you must auction the utility to the highest bidder.

Landing on the Railroads

If you are the first to land on the railroad, you may buy it. If you decide not to buy, you must auction it to the highest bidder. Even though you declined to buy at the original price, you may join in the bidding. If the railroad is already owned when you land on it, you must pay the amount stated on the Title Deed. The amount payable will vary according to the number of other railroads owned by that player.

Landing on "CHANCE" and "COMMUNITY CHEST"

These cards may ask you to do one of the following:

- Move your token
- Pay money – for example, in taxes
- Receive money
- Go to Jail
- Get Out of Jail Free

If you pick a "Get Out of Jail Free" card, you may keep it until you wish to use it, or sell it at a mutually agreed upon price.

Landing on "INCOME TAX" and "LUXURY TAX"

When you land on either one of these spaces, the corresponding amount will be deducted from your cash funds and paid to the Bank.

Free Parking

When you land on "Free Parking," you must rest here until your next turn. There is no penalty for landing here.

Jail

You will be sent to Jail if:

- You land on the "GO TO JAIL" space, *or*
- You pick a Chance or Community Chest card which tells you to "GO DIRECTLY TO JAIL," *or*
- You roll doubles three times in succession on your turn.

Your turn ends when you are sent to Jail. If you are sent there, you will not collect \$200 for passing GO, regardless of where you are on the board.

To get out of Jail you can:

Pay a fine of \$50 and continue on your next turn, or

- Purchase a "Get Out of Jail Free" card from another player at a mutually agreed upon price and use it to get out, *or*
- Use a "Get Out of Jail Free" card if you already have one, *or*
- Wait there for three turns, rolling the dice on each turn to try to roll doubles. If you roll doubles on any turn, move out of Jail using this dice roll. After you have waited three turns, you must pay \$50 and then move out of Jail.

Note: While in Jail you can collect rent on properties, provided they are not mortgaged.

Just Visiting

If you are not "sent to Jail" but, during the course of play, land on the Jail space, you are "Just Visiting" and incur no penalty. On your next turn, move ahead as usual.

Houses

Once you own all properties of a color-group, you can buy houses to put on any of those spaces. This increases the rent you can charge to passing tenants. The price of a house is shown on the relevant Title Deed.

You can only buy houses on your turn, and you must *build* evenly. You cannot build a second house on any one site of a color-group until you have built one house on every site of that

group, and so on, up to a maximum of four houses per property. Selling houses must also be done evenly. You can buy or sell at any time, and as many buildings as your judgment and financial standing will allow.

Note: Houses may not be built if *any* site of the same color-group is mortgaged.

If you own all properties of a color-group, and only one or two of them have been built on, you can still collect double rent from another player who lands on one of your unimproved properties in that color-group.

Hotels

You must have four houses on *each* site of a complete color-group before you can buy a hotel. Hotels are bought in the same way as houses and cost four houses, which are returned to the Bank, plus the price shown on the Title Deed. Only one hotel may be erected on any one site.

Building Shortages

If there are no houses left in the Bank, you must wait for other players to return theirs before you can buy any. Similarly, when selling hotels, you cannot replace them with houses if there are none available.

Selling Property

You may sell undeveloped properties, railroads and utilities to any other player as a private transaction for a sum agreeable to both of you. (See "The Trading Screen" on page 13.) No property, however, may be sold to

another player if any buildings stand on any of the properties of that color-group. Should you wish to sell a property from a color-group, you must first sell all buildings on those properties to the Bank.

Houses must be sold evenly, in the same way as they were bought. (See “Houses” on page 9). Houses and hotels cannot be sold to other players. They must be sold to the Bank at *half the value* stated on the relevant Title Deed.

For hotels, the Bank will pay half the cash price of the hotel plus half the price of the four houses, which were given to the Bank for the purchase of the hotel. All hotels on one color-group may be sold at once.

If necessary, hotels can be broken back down into houses to raise money. To do this, you can sell a hotel to the Bank and receive, in exchange, four houses as well as money for the hotel (i.e. half its cost).

Mortgaged property *cannot* be sold to the Bank, but can be sold to other players.

Mortgages

If you have no money left and are required to pay a debt, you can raise money by mortgaging a property. To do this, first sell off any buildings on that property to the Bank. (See “Mortgage” on page 12.) When you wish to repay your mortgage, you must pay the amount of the mortgage plus 10% interest.

Note: If you mortgage a property, you retain possession of it. No other player can secure it by paying off the mortgage to the Bank.

Rent cannot be collected on a mortgaged property. It can, however, still be collected for other properties of that color-group.

You can sell mortgaged property to other players at any agreed upon price. The buyer can then decide to remove the mortgage immediately by paying off the mortgage plus the 10% interest. Alternatively, he/she can pay the 10% but retain the property with a mortgage. In this case, when the mortgage is finally removed an additional 10% is payable.

When all sites of a color-group are no longer mortgaged, the owner may begin to buy back houses at full price.

Bankruptcy

If you owe the Bank or another player more money than you can raise from your assets, you are declared bankrupt and are out of the game.

If your debt is to the Bank, the Bank takes all your cash and Title Deeds. The Bank then auctions off each property to the highest bidder.

If you are made bankrupt by another player, your houses and hotels are sold to the Bank at half their original cost and that player receives any cash, Title Deeds and “Get Out of Jail Free” cards you own. If you own any mortgaged property, you must turn it over to that player. That player must immediately pay 10% and

then choose whether to retain the mortgage or pay it off in full now.

Short on Cash?

If you owe more rent than you can pay in cash, you may pay your creditor part in cash and part in property (i.e. empty building sites). In this case, the creditor may choose to accept certain property (even if it is mortgaged) at a value far in excess of the printed one in order to obtain additional sites, or to block another player from obtaining control of that property.

Money can only be loaned to a player by the Bank, and then only by mortgaging property.

These buttons are associated with the Status button you selected. Click on the different buttons to view specific types of information. **Note:** This screen also features the special *MONOPOLY* calculator. See below for details.

Main – Click here to return to the game in progress.

THE MONOPOLY CALCULATOR

The *MONOPOLY* calculator is quite different from a standard calculator in that it is geared towards specific game functions. If you roll the mouse cursor over the various function keys, a description of that button's purpose will appear in the text field to the right of the calculator.

To begin using the calculator, click on the key for the function that you wish to use. You will then be prompted with short instructions. Next you will be asked to do one of two things:

- Pick a Title Deed from the set that will appear just below the calculator, OR
- Pick a token from those that appear in a field replacing the numeric keys.

Now all you have to do is follow the instructions. Your answer will appear in the smallest text field, directly above the numeric keys.

Note: The numeric keys themselves aren't supposed to be functional, and are included in the calculator just for fun.

Important! Between each separate use of a function key, you must click on the “clear” key to reset the calculator.

THE TRADING SCREEN

How to Propose a Trade to Another Player

Select the player with whom you wish to trade.

Next, click on the properties, futures, immunities or money icons to trade those assets, respectively. Your assets are located on the left

side of the screen while the player with whom you wish to trade is located on the right side of the screen. When you are satisfied with the trade setup, click on the “Propose” button. If at any time you wish to cancel the trade, click on the “Cancel” button.

Your opponent must choose whether to ACCEPT, COUNTER or REJECT the deal. If he/she accepts the deal, play returns to the Gameplay screen with the assets transferred. If he/she rejects the deal, play returns to the Gameplay screen with nothing having changed hands. If he/she chooses to counter the offer, then the opponent now controls the terms of the deal.

Trading Mortgaged Properties

If you receive mortgaged property as part of a deal, you must pay 10% of the mortgage value as a surcharge for taking over the mortgage. If you later unmortgage the property, you will have to pay the mortgage principle plus 10%.

Other Ways to Raise and Spend Money

If you need to raise money, you can always sell a house or hotel back to the Bank. If you're rolling in the dough, however, you can use that extra cash to buy a house or hotel, or to unmortgage a property. **Note:** The property owner must then pay the Bank the amount of the mortgage plus 10% interest.

Winning

The last player left in the game is the winner.

THE SHORT GAME

At the start of a short game, the Bank deals two properties at random to each player. The players must immediately pay the Bank the price of each property. Play then continues as in a normal game.

In a short game, it is necessary to have only three houses (instead of four) on each property of a complete color-group before the player may buy a hotel. Rent for a hotel remains the same as in the normal game. The turn-in value of a hotel is still one-half the purchase price, which in this game is one house less than in the normal game.

As in the normal game, the first player to go bankrupt retires from play. However, when the second bankruptcy occurs, the game ends. Play immediately ceases, with the bankrupt player turning over to their creditor all that they have of value, including houses and hotels and any other properties. This happens when the creditor is a rival player or the Bank.

Each remaining player then values their own assets: (1) cash on hand; (2) property, utilities and railroads owned at the price displayed on the board; (3) any mortgaged property owned at the price displayed on the Title Deed; (4) houses, valued at purchase price; and (5) hotels, valued at purchase price including the value of the three houses turned in.

The richest player wins!

1. Close all running programs.

9. Register your information and login into GameSpy Arcade.

10. Find *MONOPOLY* under **My Games**. If you don't see it, scan for games in the file menu.

How to Play MONOPOLY in GameSpy Arcade

You can play *MONOPOLY* online through GameSpy Arcade, which comes conveniently bundled with the game. If you haven't done so already, insert your *MONOPOLY* CD and install Arcade now. Then, to play *MONOPOLY* online, just follow these simple instructions:

Launch GameSpy Arcade and Go to the MONOPOLY Room: Click on the GameSpy Arcade link in your Start menu. When the software starts, you'll see a list of games and more along the left-hand side. Click on the *MONOPOLY* button on the left to enter the *MONOPOLY* room.

Find or Start a MONOPOLY Server: Once you're in the *MONOPOLY* room you can meet or greet other players, find servers or create your own server. The top half of the application will list all of the available servers, including

the number of people playing and your connection speed (measured “ping” — the lower your ping, the better). Don’t like any servers? Click on the “Create Room” button to start your own server and wait for people to sign up. (A clever server name usually attracts people.) Otherwise, double-click on a server of your choice to join in.

Joining and Starting a Game

Once you double-click on a server or start your own, you’ll be in a staging room, in which you can talk with your fellow players. When you’re ready to play, click the “Ready” button at the top of the screen. When everyone in the room has signaled their readiness, the host can then launch the game. Arcade will fire up *MONOPOLY* and the game will begin!
